PROFILE

Proactive and versatile Junior Software Engineer with a background in web and mobile development, specialising in React, JavaScript, and MERN stack. Skilled in building responsive, high-quality web applications, addressing performance bottlenecks, and collaborating with cross-functional teams to deliver user-focused solutions. Recently contributed to impactful projects at Kionnali Living Systems Ltd, including developing React-based prototypes, resolving performance bugs, and using AWS for scalable data storage. Strong commitment to learning, adaptability, and creating seamless, efficient user experiences in Agile environments.

SKILLS

PROGRAMMING LANGUAGES : JavaScript, Ruby, HTML, CSS

FRONTEND : React, React Native, Bootstrap, Sass, Webflow, Bubble.io

BACKEND : Node.js, Express, MongoDB, Rails, PostgreSQL

TOOLS : Git, GitHub, Expo, Xcode, Mailchimp, ClickUp, Zapier

DESIGN & PROTOTYPING : Figma, Entity Relationship Diagrams, Wireframes

SOFT SKILLS : Problem-Solving, Collaboration, Communication, Presentation Skills

PROFESSIONAL EXPERIENCE

Kionnali Living Systems Ltd | Remote

October 2023 – Present

- **Kionnali App Prototype:** Built an interactive app prototype using React, providing investors with a visual demo of the platform's key features, including sign-in, dashboard, command center, and community pages.
[GitHub](#)
- **Website Revamp:** Redesigned and launched the company website on Webflow, collaborating with co-founders to translate Figma designs, ensure responsive design, and manage content via Webflow's CMS.
[Kionnali.com](#)
- **Pre-Order System:** Developed a pre-order booking system on Bubble.io, integrating Stripe payments, CRUD functionality, and secure login to streamline user booking and account management.
[Pre-Order Site](#)
- **Story Builder App:** Created an interactive single-page app on Bubble.io to guide users through product selection, offering save and share options.
[Story Builder](#)
- **LightForm Home User App:** Building a mobile app using React Native and MERN stack, implementing real-time testing with Expo and designing reusable components. Integrated data visualization with React Native Chart Kit for future dynamic data.
