SELINA LAVERY

Aberdeenshire, Scotland | selinalavery@gmail.com | selinalaverydev.github.io/selina-dev-portfolio | github.com/SelinaLaveryDev | LinkedIn: /in/selina-lavery

TECH STACK

Frontend:
React, TypeScript, JavaScript, HTML, CSS, Next.js, Tailwind
Libraries:
Day.js, Recharts, Axios
Tools:
Git/GitHub, Figma, Chrome DevTools
APIs/Integrations:
REST APIs, Stripe
Platforms:
Webflow, Bubble.io

EDUCATION

Software Engineering Immersive
General Assembly (Remote), 2022–2023

BA (Hons) Marketing & Communications
Glasgow Caledonian University, 1999–2003

VOLUNTEERING

Digital Comms Officer (Volunteer) — Stonehaven Amateur Swimming Club — Oct 2023–Present

- Designed and shipped the club website end-to-end from Figma to live site, including structure, UI, domain setup.
- Manage ongoing updates and content changes, improving usability and consistency across pages.

PROJECTS

- React Weather App: geolocation and search, OpenWeather API integration, error/loading states, responsive UI, modular components.
- Portfolio projects: Frontend Mentor builds focusing on semantic HTML, responsive layouts, and accessibility.

PROFILE

Frontend developer with professional experience shipping user-facing features in startup and volunteer environments. Comfortable taking designs from Figma to production-ready React UI, working with a service-layer approach, and collaborating via GitHub PRs and code review. Strong foundations in semantic HTML, responsive CSS, and UI state management.

PROFESSIONAL EXPERIENCE

Front-End Developer | London-based Startup OSO Organised (Remote) — May 2025–Present

- Build and iterate core MVP pages using React (19) and TypeScript from Figma designs (Dashboard, Calendar, Payments).
- Implement key flows including task CRUD via modal, date filtering, payment paid/owed toggles, totals and sorting, and dashboard metrics/charting.
- Integrate UI with a service-layer architecture (tasksService, paymentsService, dateTimeService) to prepare the codebase for real database integration.
- Improve maintainability through PR feedback: extract reusable components, centralise date logic, simplify dashboard calculations, and align implementation with project conventions.
- Collaborate via GitHub branches/PRs, code review, clear commits, and iterative improvements with a senior engineer and founders.

Software Engineer | Kionnali Living Systems Ltd (Hybrid) — Oct 2023–Dec 2024

- Delivered a Bubble.io pre-order site with Stripe checkout and secure login to support early product sales.
- Maintained and updated the web pages in Webflow, using ClickUp tickets and Figma designs.
- Supported the site rebuild following a rebrand (layout updates, content changes, QA).
- Coded responsive HTML email newsletters; tested across clients in Litmus (including dark mode) and improved consistency.

Earlier career (training & comms): Bank of Scotland (Regional Trainer) and Sky (Operational Trainer).
